

A Rocha International

Africa's smallest owl

The Dakatcha Woodlands Project in Kenya is a Key Biodiversity Area noted for 13 Red Listed species, including 4 endangered species, among them Africa's smallest owl, the Sokoe Scops Owl. Unprotected, the area is currently being cleared at an alarming rate for charcoal and agriculture.

We believing that God cares about every species he created. So Emmanuel made a one-off donation in 2023 to help A Rocha Kenya to create a Nature Reserve and safeguard part of this indigenous forest and its threatened wildlife.
